BYTES FOUNDATION NAMES INAUGURAL RECIPIENTS OF TECHNOLOGY SERVICES GRANT

PHOENIX, AZ – The Bytes Foundation has named the first recipients of its technology services grant. The first round of nonprofit organizations to receive services from the Bytes Foundation includes Loud For Tomorrow (El Cajon, CA), the California Transfer Support Network (Delano, CA) and Our Father’s Table (Batesville, AR). These nonprofit organizations will receive free computers, software, training, and related technical services through the Bytes Foundation.

“This is an incredibly exciting moment for the Bytes Foundation because we get to see our first group of organizations receive support through our grant”, said Founder and Chairman Zac Brown. “This will allow these organizations to modernize their operations and focus on achieving their missions through the utilization of technology.”

####

The Bytes Foundation is a Phoenix based nonprofit organization that provides free computers, software, training, and related technical services to other eligible nonprofit organizations operating within the United States. Born out of the difficulties nonprofits faced during the pandemic, the Bytes Foundation focuses on using technology to solve operational problems so organizations can focus on achieving their goals.
